Population growth + changing age structure

"The department's determination shall be based on population projections..." GC 65584.01(a)

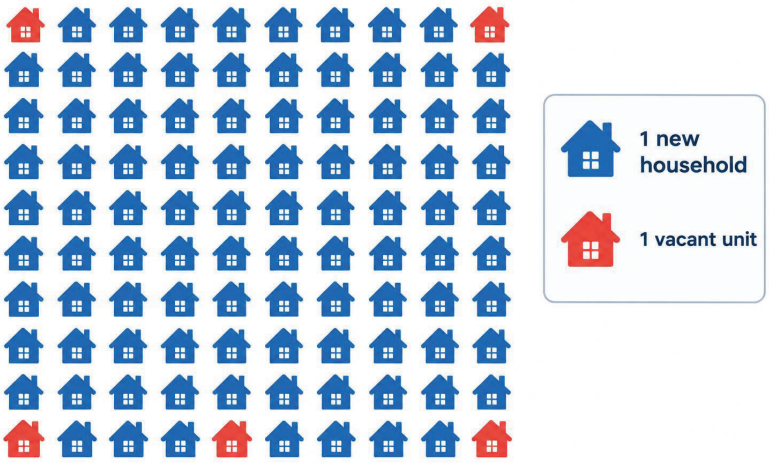

Data Source: DOF P3 Projections and Connect SoCal 2050 Preliminary Projections

- DOF projects total population will grow by 94,705
- Because growth is at high ages with high formation rates,
- this corresponds to an increase of 245,093 households

SCAG staff assessment of prior cycles' RHNDs

5th Cycle RHND:	6th Cycle RHND:	7th Cycle RHND:
97% of total	35% of total	18% of total

Ensure that *future households* have enough "slack" in the market

- Per DOF + HCD, region will add 245,093 house**holds**, but to maintain a healthy vacancy rate, it needs slightly more **housing units:**
- HCD standard for renter market: 7 percent *(statutory minimum of 5 percent)*
- HCD standard for owner market: 2 percent
- Add 16,275 units
