14. Jobs Housing Relationship Adjustment: HCD applies an adjustment based on the number of in-commuters to a region. The adjustment is calculated by dividing the number of in-commuters to the region by HCD's jobs/housing standard of 1.5. In SCAG, the number of employed residents was below the number of people employed in the region, resulting in an adjustment of 9,467. Data is from the US Census Bureau LEHD Origin-Destination Employment Statistics, 2023.

15. Homelessness Adjustment: HCD applies an adjustment based on the housing needs of individuals and families experiencing homelessness. For non-COG regions and COGs that do not provide their own data, by default, HCD uses the most recent Point-in-Time counts from the region's Continuums of Care and DOF household formation rates. SCAG's Continuums of Care include Imperial County, Los Angeles City and County, Santa Ana, Anaheim/Orange County CoC, Riverside City and County, San Bernardino City and County, Oxnard, San Buenaventura/Ventura County CoC, Long Beach CoC, Pasadena CoC, and Glendale CoC. An adjustment of 38,646 units was applied to SCAG using data from the HUD 2025 Point-in-Time Count and DOF household formation rates. This adjustment is allocated to the acutely low- and extremely low-income categories, with 75% of the adjustment allocated to the acutely low-income category and 25% allocated to the extremely low-income category.

16. State of Emergency Adjustment: HCD uses data provided by the California Governor's Office of Emergency Services (CalOES) and the California Department of Forestry and Fire Protection (CAL FIRE) pursuant to Government Code section 65584.01, subdivision (b)(1)(I), to calculate the number of units lost due to a declared state of emergency during the previous planning period (since 2021) and which have not been rebuilt or replaced. CalOES and CAL FIRE inspection data was retrieved by HCD in August 2026. HCD defines a rebuilt or replaced unit as the issuance of a building permit in the affected area, as reported in the Annual Progress Report or other local data sources, and subtracts the number of building permits from the count of units lost. To estimate the percentage of units lost that were originally occupied, HCD uses 2024 5-year ACS data (B25004) to calculate the percentage of units in the region that are temporarily occupied by persons with a usual residence elsewhere. The occupancy rate is then applied to the net units lost due to a state of emergency. For SCAG, this resulted in an adjustment of 8,056 units to the RHND. HCD uses the California Franchise Tax Board and CalOES list of disasters and emergency proclamations to ensure that only units destroyed by a Governor-declared State of Emergency in the region are utilized when calculating this adjustment.

17. Occupied Units: Reflects DOF's projected occupied units at the start of the projection period (June 30, 2029).

18. Preliminary Regional Housing Need Determination: Housing need calculated after applying calculations 1-17. This preliminary RHND is used to evaluate feasible balance between jobs and housing and the Replacement Adjustment (Seasonal, Recreational, and Occasional Use).

19. Replacement Adjustment (Seasonal, Recreational, and Occasional Use Housing Units): In addition to the demolition replacement adjustment, HCD also applies a replacement adjustment to account for housing units that are not available for permanent year-round occupancy. This adjustment is calculated based on the change in the percentage of
